Re: Biennial Needs Survey for Clean Water (Wastewater) and Drinking Water Projects,
State Revolving Fund (SRF)

Please find our biennial Combined Needs Survey form attached. This new combined form replaces the separate Clean Water (wastewater) and Drinking Water Needs Surveys that were used in previous years. We are asking you and every community in Nebraska about their Wastewater and Drinking Water Infrastructure project needs. Filling out this survey will help us present the best possible information on state funding needs to decision-makers, including our state legislature, the U.S. Congress, and the Environmental Protection Agency.

Filling out the Needs Surveys in no way commits you to undertake a project or signing an SRF loan. The information you supply will be used to develop the Intended Use Plan and develop a list of eligible projects that can be funded through Nebraska's SRF. We encourage you to seek assistance completing the surveys from your engineer or consultant.

Please fill out the enclosed forms and ensure that they are postmarked by January 15, 2024, to:

**State Revolving Fund Section, NDEE
P.O. Box 98922
Lincoln, NE 68509-8922**

Alternatively, you may email the completed form to: ndee.srf@nebraska.gov. Any questions regarding these surveys may also be submitted to the email above.

We are consolidating our email lists and apologize if you receive multiple emails.

Sincerely,

The NDEE SRF Team
