Title 107 STATE ENERGY OFFICE

Chapter 1 - INTRODUCTION

001 In 1980, the Unicameral passed LB 954 which established the Nebraska Building Energy Conservation Standard, which was ASHRAE 90-75. In 1983, the Legislature replaced the Nebraska Building Energy Conservation Standard with the Nebraska Energy Standard, which was the 1983 Model Energy Code. In 2004, LB 888, which was unanimously passed by the Legislature, had two goals: 1) replace the 2000 International Energy Conservation Code (IECC) with the 2003 IECC for state-owned buildings; and 2) replace 1983 Model Energy Code with the 2003 IECC in the Nebraska Energy Code which applies to all buildings across the state. LB 329, which updates the Nebraska Energy Code from the 2003 IECC to the 2009 IECC and ASHRAE 90.1-2007, was passed by the state's Unicameral Legislature on April 8, 2011 and signed by the Governor on April 14, 2011

002 The following Rules and Regulations pertain to the procedures to be used to comply with the law by the State Energy Office, local code authorities, building designers, contractors, owners, and all other interested parties. These Rules and Regulations implement the provisions of the law regarding the Nebraska Energy Code.

003 The amendments to Title 107, Nebraska Administrative Code, Chapters 1-6, are effective on and after August 27, 2011.
